

Moat Homes – Procurement Pipeline May 2024

Below is the anticipated procurement pipeline for Moat Homes as at May 2024. Please note the following:

The projects and dates below are subject to change at any time depending on business need and Moat Homes reserves the right to amend this pipeline at any time by adding or deleting requirements. The pipeline will be updated at least annually and will be published via the UK Government’s Central Digital Platform when this becomes available.

These requirements cover values including those above and below the Procurement Thresholds (as at January 2024).

The ‘Anticipated Start Date’ is the current estimate of the time when the procurement team will start pre-procurement activities leading to the development of a procurement strategy. **This is not the date on which any tender document will be issued.** Depending on the nature of the requirement, procurement will potentially commence this work several months prior to the issue of a Call for Competition Notice, or the issue of procurement documents for a mini-competition or quotation process.

Not all requirements will be procured on an advertised tender basis. Moat does make use of several framework agreements procured by third parties, as well as running our own quotation processes for below-threshold requirements.

In the event that we opt not to use an existing framework agreement for above threshold requirements, these will be advertised on the Find a Tender Service (<https://www.gov.uk/find-tender>). Moat uses the Proactis Housing Procurement portal (www.housingprocurement.com) as its e-procurement platform. There is no charge for suppliers to register on either Find a Tender Service or the Housing Procurement Portal.
